

AIRCRAFT PERFORMANCE GROUP

The Future For **APG** is **PRO**

AIRCRAFT PERFORMANCE GROUP

H-APROR 87

Your Mission, Our Passion

APG has been trusted for 20+ years,
providing mission-critical software and
data solutions relied upon by aviators
and operators globally.

Now, we are connecting the dots
with an integrated, fully synchronized
experience from dispatch to destination
with iPreFlight Genesis® **PRO**.

Offer superior service to your customers
with a technology that reduces costs,
increases efficiency and has industry-
leading 24/7 live customer support.

iPreFlight Genesis[®] PRO

Supercharge your flight operations with a fully integrated solution for flight planning, filing, dispatch, flight schedules and more.

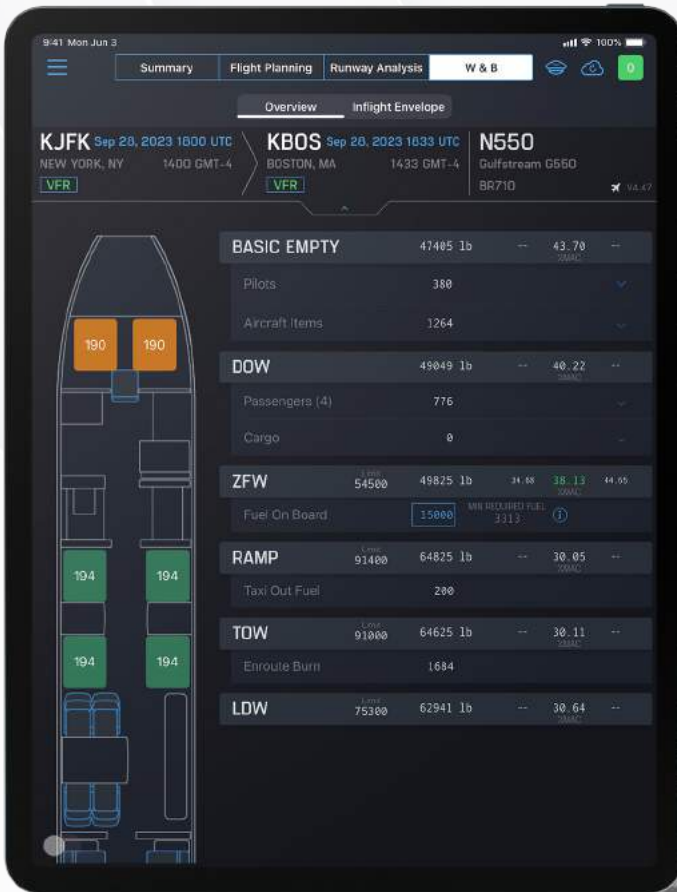

Obtain a crystal-clear picture to validate the flight is planned within operational limits, with a synchronized workflow focused on compliance and maximizing fleet capability.

Runway Analysis

iPreFlight Genesis **PRO** features customizable performance calculations in an easy-to-use flow, with Graphical Engine Out Procedures built for quick briefing and reference.

Weight & Balance

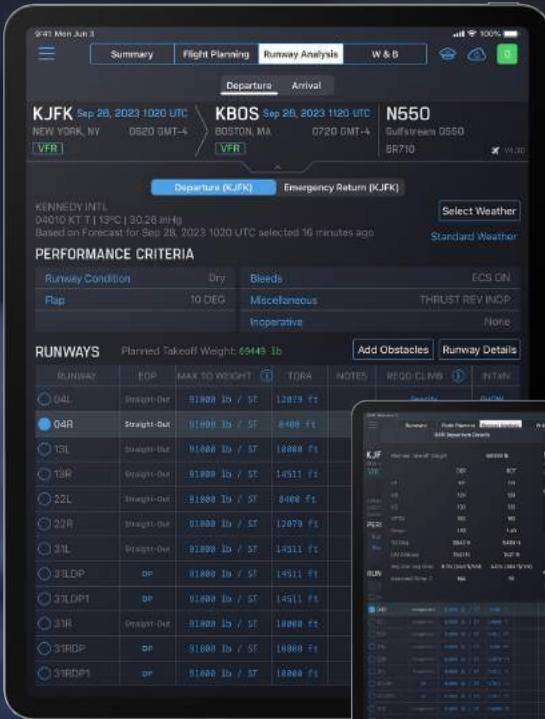

Weight & Balance

Maximize flight safety and minimize the time to perform planning with customizable floor plans and loading stations tailored to your specific aircraft. Easily create compliant Weight & Balance reports on demand, with the ability to send to the crew for confirmation and final adjustments.

Additionally, the CG envelope view allows for a quick understanding of aircraft load limits, fuel burn curve and curtailment envelope.

Fly smarter, safer, and more confidently using the APG SID Analyzer!

APG SID Analyzer

Your Essential Tool for Safe Departures

APG's latest innovation, SID Analyzer, revolutionizes departures. This groundbreaking feature seamlessly combines Runway Analysis (RWA) with TERPS/PANS-OPS compliance checks, ensuring your aircraft meets rigorous climb requirements while factoring in one-engine-inoperative (OEI) scenarios.

SID Analyzer empowers you to confidently analyze takeoff performance, striking the perfect balance between safety and operational efficiency. Additionally, it enhances situational awareness with Average 2nd Segment Climb Gradient data, providing real-time insights into your climb performance.

FlightBoard

Real-time, Precision Flight Tracking

APG's FlightBoard offers innovative flight awareness designed to monitor all types of flights, enhances real-time flight awareness by tracking the status of flights and aircraft, and improves operational decision-making.

Whether you're an aircraft operator, FBO, or aviation service provider, FlightBoard is your ticket to managing all your assets on one platform. Easy to set up and customize, FlightBoard works effortlessly within FAA and EUROCONTROL airspace.

APG Consulting Services

Reach New Heights with Our Experts

Our consulting team has helped clients innovate, improve strategic positioning and drive financial success. We have spent many years helping dozens of leading players across the aviation ecosystem.

How We Can Help

Audit Support
Documents

Weight & Balance
Curtaiment Reports

Custom Airport Design
Consultation

Missed Approach/Balked
Landing Reports

Runway Extension
Analysis

Custom Engine Out
Procedure Design

isFlightPossible

Determine Flight Feasibility

Get instant confirmation on the feasibility of any flight with APG's isFlightPossible API solution. Quickly determine the best aircraft suited for any mission, whether it is required today or months from now, with minimal inputs and using actual aircraft capabilities.

Instant flight feasibility response for your customers

Determine the best aircraft for the required mission

Leverage highly accurate performance calculations

Flexible API for custom integration

Helps minimize fuel stops & maximize payload

APG Customer Service

At APG, we offer best-in-class customer support because we understand that sometimes you need a little help. APG employees come from a variety of aviation and IT backgrounds, including pilots, aerospace engineers, dispatchers, and software engineers.

Best-in-Class Support

We take pride in our best-in-class customer support from members who have aviation backgrounds.

24-7 Support

We are here for you. If you have a question, just ask.

Talk to Real People

Support from people who've been in your shoes and can help guide you.

A dark, monochromatic photograph of an airfield. In the foreground, the silhouettes of four people in flight attire are visible. From left to right: a woman in a uniform, another woman in a uniform, a man in a pilot's uniform, and a woman in a uniform. They are standing on a tarmac, with the wing and tail of a large aircraft visible above them. In the background, another aircraft is parked. The overall mood is professional and serene.

We've helped many businesses, just like yours, enhance revenue, stay in compliance and obtain safe flights. Take your company to the next level with fully featured flight technology.

What Our Customers Say

- “ APG is a leader in aircraft performance software for dispatchers and pilots. This, coupled with its excellent and responsive customer support, allowed us to make the very easy decision to continue our relationship. We look forward to seeing how iPreFlight Genesis PRO can improve the optimization of our fleet management over the coming years.
- “ Our operational focus revolves around flight safety and safe practices. APG is an integral part of that by providing us the useful tools for obstacle analysis and weight and balance. The folks at APG are always accommodating and respond quickly when we have aircraft weight changes, add an aircraft or have any need for revised information. We've been partners with them for years and we're truly amazed by the customer service. We look forward to many more years of safe operations with our partners at APG.
- “ APG is simple, saves a ton of time on performance calculations, and their customer service is fantastic!

Thank you for the wonderful service we receive from APG. Your customer service is second to none. Every time I have a request, your team has always been there to help. I especially appreciate your fast setup of new aircraft that join my fleet. I look forward to many more years of working together.
