

ChartData: Empowering Aviation Worldwide

For over a decade, ChartData has been the go-to global aviation data service offered by APG. Trusted by industry giants like Honeywell®, Aspen Avionics®, and Dynon®, ChartData has been an essential component of APG's products. Now, we proudly introduce our latest and most advanced offering: iPreFlight Genesis® PRO, powered by ChartData.

Unleash the Power of ChartData:

Plates

Gain access to Global Geo-referenced Approach Plates, SIDs, and STARs. With comprehensive coverage, you'll have the information you need at your fingertips.

EOPS

Experience the benefits of enhanced safety and preparedness with Global Geo-referenced Graphical Engine Out Procedures.

Airport Diagrams

Confidently navigate on the ground with our Geo-referenced Airport Diagrams for 4,800 US airports - thousands more than the FAA provides.

Global Coverage:

Worldwide Flight Planning Routes

Explore flight planning routes from more than 150 countries.

78,000+ Plates and Diagrams

Access an extensive database of approach plates, diagrams, and essential aviation data.

55,000+ Airports Globally

From major international hubs to remote airstrips, our data covers over 55,000 airports worldwide.

Tailored Data Solutions:

We understand that every aviator has unique requirements. That's why we offer customized ChartData, catering to nearly a dozen in-panel avionics and mobile applications. Join thousands of satisfied customers who rely on our tailored data solutions.

Unlock the Full Potential of Aviation Data:

Discover the power of ChartData today and elevate your aviation experience. Contact our dedicated team to learn more about our services, licensing options and how we can help you soar to new heights.
