

iPreFlight

Genesis™ Performance

A Robust App that Started the Performance Calculation Revolution

Optimized for the iPad, iPreFlight Genesis Performance features runway analysis and weight & balance to ensure your flights are safe and effective. Expedite flight planning with a flexible workflow that delivers dynamic and cohesive computations based on manufacturer data.

Our performance engine handles the number crunching, and automation maximizes efficiency, all while meeting regulatory requirements for engine-out performance calculations. Pilots, dispatchers and flight operations can swiftly plan a flight.

Ensure safety, boost efficiency, and decrease costs with **iPreFlight Genesis Performance**.
